No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1994 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 308

Number 1, January 1994

RESEARCH REPORT

- Occurrence of an NAD⁺ Glycohydrolase in Bovine Brain Cytosol *Junji Yamauchi and Sei-ichi Tanuma* 327

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

- Ascorbic Acid Radical, Superoxide, and Hydroxyl Radical Are Detected in Reperfusion Injury of Rat Liver Using Electron Spin Resonance Spectroscopy
Hitoshi Togashi, Haruhide Shinzawa, Huang Yong, Tsuneo Takahashi, Hiroyuki Noda, Kazuo Oikawa, and Hitoshi Kamada 1
- Effect of Long-Term Removal of Iron from Asbestos by Desferrioxamine B on Subsequent Mobilization by Other Chelators and Induction of DNA Single-Strand Breaks *Chien-Chung Chao and Ann E. Aust* 64
- Ferritin Stimulation of Hydroxyl Radical Production by Rat Liver Nuclei
Ewa Kukielka and Arthur I. Cederbaum 70
- Inhibition of Mitochondrial Electron Transport by Peroxynitrite
Rafael Radi, Marianela Rodriguez, Laura Castro, and Rossana Telleri 89
- Peroxynitrite Inactivates Thiol-Containing Enzymes of *Trypanosoma cruzi* Energetic Metabolism and Inhibits Cell Respiration
Homero Rubbo, Ana Denicola, and Rafael Radi 96
- Oxidative Damage of Mitochondria Induced by Fe(II)citrate is Potentiated by Ca²⁺ and Includes Lipid Peroxidation and Alterations in Membrane Proteins
Roger F. Castilho, André R. Meinicke, Andréa M. Almeida, Marcelo Hermes-Lima, and Anibal E. Vercesi 158
- Residual EDTA Bound by Lens Crystallins Accounts for Their Reported Resistance to Copper-Catalyzed Oxidative Damage
Xiao-lan Cui, Chuan Qin, and J. Samuel Zigler, Jr. 207
- A Nomenclature for the Mammalian Flavin-Containing Monooxygenase Gene Family Based on Amino Acid Sequence Identities
Michael P. Lawton, John R. Cashman, Thierry Cresteil, Colin T. Dolphin, Adnan A. Elfarra, Ronald N. Hines, Ernest Hodgson, Teruyuki Kimura, Juris Ozols, Ian R. Phillips, Richard M. Philpot, Laurence L. Poulsen, Allan E. Rettie, Elizabeth A. Shephard, David E. Williams, and Daniel M. Ziegler 254
- Protective Effect of Epicatechin, Epicatechin Gallate, and Quercetin on Lipid Peroxidation in Phospholipid Bilayers
Junji Terao, Mariusz Piskula, and Qing Yao 278
- Elevated Expression of the *Cyp1a2* Gene in the Presence of Nicotinamide by Adult Mouse Hepatocytes in Primary Culture
Nobuo Nemoto and Junko Sakurai 292

BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY

- Complementary Mössbauer and EPR Studies of Iron(III) in Diferric Human Serum Transferrin with Oxalate or Bicarbonate as Synergistic Anions
Agneta Seidel, Eckhard Bill, Lennart Häggström, Per Norblad, and Ferenc Kilár 52
- Stoichiometry of Heparin Binding to Basic Fibroblast Growth Factor
Tsutomu Arakawa, Jie Wen, and John S. Philo 267

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

- Automodification of Arginine-Specific ADP-Ribosyltransferase Purified from Chicken Peripheral Heterophils and Alteration of the Transferase Activity
Kazuo Yamada, Mikako Tsuchiya, Yuko Nishikori, and Makoto Shimoyama 31
- Expression of Recombinant Inhibitor-2 in *E. coli* and Its Utilization for the Affinity Chromatography of Protein Phosphatase-1
Zhongjian Zhang, Sumin Zhao, Stephen D. Zirattu, Ge Bai, and Ernest Y. C. Lee 37

Minimum Structural Requirements for Minoxidil Inhibition of Lysyl Hydroxylase in Cultured Fibroblasts	<i>Saood Murad, Linda C. Walker, Shingo Tajima, and Sheldon R. Pinnell</i>	42
Purification and Properties of Long-Chain Acyl-CoA Hydrolases from the Liver Cytosol of Rats Treated with Peroxisome Proliferator	<i>Junji Yamada, Ichiroh Matsumoto, Takao Furihata, Mitsuhiro Sakuma, and Tetsuya Suga</i>	118
Identification of a Molecular Species in Porcine Ovarian Luteal Glutathione S-Transferase and Its Hormonal Regulation by Pituitary Gonadotropins	<i>Mitsuaki Keira, Jun Nishihira, Teruo Ishibashi, Toshinobu Tanaka, and Seiichiro Fujimoto</i>	126
Positional Effects in the Neprilysin (Neutral Endopeptidase) Reaction	<i>Tracey Quay, Clive Slaughter, Thomas P. Davis, Bradley J. Merrill, and Louis B. Hersh</i>	133
Mitomycin C Sensitivity in Human Bladder Cancer Cells: Possible Role of Glutathione and Glutathione Transferase in Resistance	<i>Bing H. Xu, Vicram Gupta, and Shivendra V. Singh</i>	164
Purification of a Thymidine-diphospho-4-keto-6-deoxy-D-glucose Epimerase from an Erythromycin-Producing Strain of <i>Saccharopolyspora erythraea</i>	<i>Bruce W. Jarvis and C. Richard Hutchinson</i>	175
Comparison of the Inhibition by Phospho(enol)Pyruvate and Phosphoglycolate of Phosphofructokinase from <i>B. stearothermophilus</i>	<i>Valarie L. Tlapak-Simmons and Gregory D. Reinhart</i>	226
S-Thiolation and Irreversible Oxidation of Sulfhydryls on Carbonic Anhydrase III during Oxidative Stress: A Method for Studying Protein Modification in Intact Cells and Tissues	<i>Chong-Kuei Lii, Yuh-Cherng Chai, Wei Zhao, James A. Thomas, and Suzanne Hendrich</i>	231
Regulation of Lysyl Oxidase mRNA in Dermal Fibroblasts from Normal Donors and Patients with Inherited Connective Tissue Disorders	<i>Heather N. Yeowell, Melanie K. Marshall, Linda C. Walker, Van Ha, and Sheldon R. Pinnell</i>	299

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

The Degradation of Phosphoenolpyruvate Carboxykinase (GTP) mRNA Is Regulated by Cyclic AMP but Not by Dexamethasone	<i>Yaacov Hod</i>	82
Identification of Calbindin D-9k mRNA and Its Regulation by 1,25-Dihydroxyvitamin D ₃ in Caco-2 Cells	<i>James C. Fleet and Richard J. Wood</i>	171
Diurnal Variation of the Serine Dehydratase mRNA Level in Rat Liver	<i>Hirofumi Ogawa, Henry C. Pitot, and Motoji Fujioka</i>	285

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

Differential Effects of bFGF and IGF-I on Matrix Metabolism in Calf and Adult Bovine Cartilage Explants	<i>Robert L. Sah, Albert C. Chen, Alan J. Grodzinsky, and Stephen B. Trippel</i>	137
Structures of the N-Linked Oligosaccharides of the Membrane Glycoproteins from Three Lepidopteran Cell Lines (Sf-21, IZD-Mb-0503, Bm-N)	<i>Viktoria Kubelka, Friedrich Altmann, Georg Kornfeld, and Leopold März</i>	148

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

Porin Proteins in Mitochondria from Rat Pancreatic Islet Cells and White Adipocytes: Identification and Regulation of Hexokinase Binding by the Sulfonyleurea Glimepiride	<i>Günter Müller, Andrea Korndörfer, Uwe Kornak, and Willy J. Malaisse</i>	8
Conformational Features of Erythrocyte-Bound Chloroquine from Double-Selective ¹ H NMR Relaxation	<i>Elena Gaggelli, Nicola Gaggelli, Antonella Maccotta, and Gianni Valensin</i>	48
Characterization of the Human Placental Membrane Receptor for Transcobalamin II-Cobalamin	<i>Edward V. Quadros, Prakash Sai, and Sheldon P. Rothenberg</i>	192

- Ascorbate/Iron Activates Ca^{2+} -Release Channels of Skeletal Sarcoplasmic Reticulum Vesicles Reconstituted in Lipid Bilayers
Detcho A. Stoyanovsky, Guy Salama, and Valerian E. Kagan 214
- Accumulation and Metabolism of Adenallene by Murine Leukemia L1210 Cells
David Kessel and Jiri Zemlicka 222
- Receptor-Independent Uptake of Transferrin-Bound Iron by Reticulocytes
Leah L. Hodgson, Elizabeth A. Quail, and Evan H. Morgan 318

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Biosynthesis of the Diterpene *cis*-Abienol in Cell-Free Extracts of Tobacco Trichomes
Zhenhua Guo, Ray F. Severson, and George J. Wagner 103
- Purification and N-Terminal Sequence Analysis of Pea Chloroplast Protein Synthesis Factor EF-G
Mahinur Sezener Akkaya, Piri L. Welcsh, Michael A. Wolfe, Barbara K. Duerr, Wayne J. Becktel, and Caroline A. Breitenberger 109
- Partial Purification and Characterization of Maize-Leaf Pyruvate,Orthophosphate Dikinase Regulatory Protein: A Low-Abundance, Mesophyll-Chloroplast Stromal Protein
Christopher M. Smith, Stephen M. G. Duff, and Raymond Chollet 200
- Diterpenoid Resin Acid Biosynthesis in Conifers: Characterization of Two Cytochrome P450-Dependent Mono-oxygenases and an Aldehyde Dehydrogenase Involved in Abietic Acid Biosynthesis
Christoph Funk and Rodney Croteau 258

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Determination of the Relative Percentage Deuteration of the Ribosomal Protein S4 by Electrospray Ionization Mass Spectrometry
Erol E. Gulcicek, David H. Harrison, and Shida Shen 24
- Amino Acid Sequences of Two High-Potential Iron Sulfur Proteins (HiPIPs) from the Moderately Halophilic Purple Phototrophic Bacterium *Ectothiorhodospira vacuolata*
R. P. Ambler, T. E. Meyer, and M. D. Kamen 78
- cDNA Sequences for Four Snake Venom Metalloproteinases: Structure, Classification, and Their Relationship to Mammalian Reproductive Proteins
Lawrence A. Hite, Li-Guo Jia, Jón B. Bjarnason, and Jay W. Fox 182
- Identification and Characterization of Endothelin Converting Activity from EAHY 926 Cells: Evidence for the Physiologically Relevant Human Enzyme
Lloyd Waxman, Kundan P. Doshi, S. Lee Gaul, Shiping Wang, Rodney A. Bednar, and Andrew M. Stern 240
- Thioester Hydrolysis by Matrix Metalloproteinases
Ross L. Stein and Maria Izquierdo-Martin 274
- C-Type Galactoside-Binding Lectin from *Bothrops jararaca* Venom: Comparison of Its Structure and Function with Those of Botrocetin
Yasuhiro Ozeki, Tai Matsui, Jiharu Hamako, Masami Suzuki, Yoshihiro Fujimura, Eri Yoshida, Sachiyo Nishida, and Koiti Titani 306
- The Highly Efficient Production of Full-Length and Mutant Rat Brain Calcium-Binding Proteins (Calbindins- $\text{D}_{28\text{K}}$) in a Bacterial Expression System
Rajiv Kumar, Willi Hunziker, Myron Gross, Stephen Naylor, James M. Londowski, and Janet Schaefer 311

Number 2, February 1, 1994

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

- Specific Incorporation of Molybdopterin in Xanthine Dehydrogenase of *Pseudomonas aeruginosa*
Mahesh S. Joshi and K. V. Rajagopalan 331
- A Mechanism for the Stimulatory Effect of Aluminum on Iron-Induced Lipid Peroxidation
Patricia I. Oteiza 374

Kinetics of the Reduction of Cytochrome b ₅ with Mutations in Its Membrane-Binding Domain	Fang Fang Wu, Guy Vergères, and Lucy Waskell	380
H ₂ O ₂ -Induced Increases in Cellular F-Actin Occur without Increases in Actin Nucleation Activity	Geneva M. Omann, Josephine M. Harter, Jeanne M. Burger, and Daniel B. Hinshaw	407
BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY		
<i>DESIGN</i> : A Guide to Protein Crystallization Experiments	Jan Sedzik	342
Crystallization and Preliminary Crystallographic Studies of the Crystals of the Azurin <i>Pseudomonas fluorescens</i>	Dao-Wei Zhu, Tanya Dahms, Kevin Willis, Arthur G. Szabo, and Xavier Lee	469
ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION		
8-(4-Bromo-2,3-dioxobutylthio)NAD: A New Affinity Label for NAD-Specific Isocitrate Dehydrogenase	Ajay Kumar and Roberta F. Colman	357
Inhibition and Inactivation of Horse Liver Alcohol Dehydrogenase with the Imidazobenzodiazepine Ro 15-4513	Bjørn T. Langeland and John S. McKinley-McKee	367
New Subunit in L-Phenylalanine Oxidase from <i>Pseudomonas</i> sp. P-501 and the Primary Structure	Etsuko B. Mukouyama, Haruo Suzuki, and Hirokazu Koyama	400
Hepatic 5'-AMP-Activated Protein Kinase: Zonal Distribution and Relationship to Acetyl-CoA Carboxylase Activity in Varying Nutritional States	Lee A. Witters, Guang Gao, Bruce E. Kemp, and Bjørn Quistorff	413
Effect of Dietary Protein on the Liver Content and Subunit Composition of the Branched-Chain α -Ketoacid Dehydrogenase Complex	Yu Zhao, Kirill M. Popov, Yoshiharu Shimomura, Natalia Y. Kedishvili, Jerzy Jaskiewicz, Martha J. Kuntz, Joy Kain, Bei Zhang, and Robert A. Harris	446
6-Phosphofructo 2-Kinase/Fructose 2,6-Bisphosphatase in Liver of the Teleost <i>Sparus aurata</i>	P. García de Frutos and I. V. Baanante	461
Determination of the Number of Sucrose and Acceptor Binding Sites for <i>Leuconostoc mesenteroides</i> B-512FM Dextranucrase, and the Confirmation of the Two-Site Mechanism for Dextran Synthesis	Dongling Su and John F. Robyt	471
The Lactate/Pyruvate Shuttle in Spermatozoa: Operation <i>in Vitro</i>	Fernando G. Gallina, Nelia M. Gerez de Burgos, Carlos Burgos, Carlos E. Coronel, and Antonio Blanco	515
Effect of L-Malate on Pyruvate Dehydrogenase Activity of Spermatozoa	Nelia M. Gerez de Burgos, Fernando Gallina, Carlos Burgos, and Antonio Blanco	520
GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES		
Structural Characterization of the N-Glycans of a Humanized Anti-CD18 Murine Immunoglobulin G	Charlotte C. Yu Ip, William J. Miller, Mel Silberklang, George E. Mark, Ronald W. Ellis, Lihua Huang, John Glushka, Herman Van Halbeek, Jill Zhu, and Jack A. Alhadeff	387
Isolation and Characterization of a Novel 20-kDa Sulfated Polysaccharide from the Extracellular Slime Layer of <i>Staphylococcus epidermidis</i>	A. Arvaniti, N. K. Karamanos, G. Dimitracopoulos, and E. D. Anastassiou	432
Mammalian Glycosyltransferases Prefer Glycosyl Phosphoryl Dolichols Rather Than Glycosyl Phosphoryl Polyprenols as Substrates for Oligosaccharyl Synthesis	Crislyn D'Souza-Schorey, Karen R. McLachlan, Sharon S. Krag, and Alan D. Elbein	497
LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS		
Regulation of 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase Gene Expression by Sterols and Nonsterols in Rat Liver	Gene C. Ness, Susan Eales, Dayami Lopez, and Zhihong Zhao	420
Binding and Metabolism of Platelet-Activating Factor (PAF) by Isolated Rat Type II Pneumonocytes	Hideshi Eguchi, Rene A. Frenkel, and John M. Johnston	426

Impaired Surface Expression of PAF Receptors on Human Neutrophils Is Dependent upon Cell Activation
Weiguo Zhou, Martin A. Javors, and Merle S. Olson 439

**MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS;
CYTOKINES AND RECEPTORS**

Characterization of Magnesium Efflux from Ehrlich Ascites Tumor Cells
Federica I. Wolf, Arianna Di Francesco, and Achille Cittadini 335

The Capacity of the Malate-Aspartate Shuttle Differs between Periportal and Perivenous Hepatocytes from Rats
Masakazu Shiota, Miyako Hiramatsu, Yuka Fujimoto, Mitsuaki Moriyama, Kazuhiro Kimura, Mitsuaki Ohta, and Tsukasa Sugano 349

Lipolytic Membrane Release of Two Phosphatidylinositol-Anchored cAMP Receptor Proteins in Yeast Alters Their Ligand-Binding Parameters
Günter Müller and Wolfram Bandlow 504

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

Monoterpene Biosynthesis: Isotope Effects Associated with Bicyclic Olefin Formation Catalyzed by Pinene Synthases from Sage (*Salvia officinalis*)
Kurt C. Wagschal, Hyung-Jung Pyun, Robert M. Coates, and Rodney Croteau 477

Stereochemistry of the Proton Elimination in the Formation of (+)- and (–)- α -Pinene by Monoterpene Cyclases from Sage (*Salvia officinalis*)
Hyung-Jung Pyun, Kurt C. Wagschal, Dai-il Jung, Robert M. Coates, and Rodney Croteau 488

**PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER,
AND POST-TRANSLATIONAL PROCESSING**

ERp61 Is GRP58, a Stress-Inducible Luminal Endoplasmic Reticulum Protein, but Is Devoid of Phosphatidylinositol-Specific Phospholipase C Activity
Richard A. Mazzarella, Nancy Marcus, Sherry M. Haugejorden, Joanna M. Balcarek, Joseph J. Baldassare, Binayak Roy, Li-jing Li, Amy S. Lee, and Michael Green 454

AUTHOR INDEX FOR VOLUME 308 525

NOTICE

The Subject Index for Volume 308 will appear in the December 1994 issue as part of a cumulative index for the year 1994.

Digitized by the Internet Archive
in 2026

Archives of BIOCHEMISTRY AND BIOPHYSICS is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Research Reports** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Research Reports provide a mechanism for rapid publication of short but complete manuscripts on outstanding and novel research findings. They should consist of 1000 or fewer words of text and a total of six or fewer figures and tables. The first paragraph should describe, without abbreviations, the background, rationale, principal findings, and conclusions of the study. Experimental methods should be reported in the table or figure legends, not in the text. Acknowledgments may be included in a footnote to the title. Omit the abstract and text subheadings, and keep literature citations to a reasonable minimum. The scientific quality of these reports should be of the highest caliber to facilitate rapid review. Authors should identify the manuscript as a Research Report and submit it directly to the Editorial Office of the journal (see below).

Accelerated status may also be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of BIOCHEMISTRY AND BIOPHYSICS

Editorial Office, 525 B Street, Suite 1900

San Diego, California 92101-4495

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information

please contact the Editorial Office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanesthetized animals conforms with the standards for use of laboratory animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details of the steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in **Archives**, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in **Archives** represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

¹ An extended Instructions to Authors is published in the January issue of **Archives of BIOCHEMISTRY AND BIOPHYSICS**. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUBMB rules and recommendations, and accepted abbreviations.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of $8\frac{1}{2} \times 11$ -in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations and P450 Reactions
Glycoconjugates and Oligosaccharides; Proteoglycans and Extracellular Matrices
Lipids, Lipid Mediators, and Glycolipids
Biophysical Chemistry and X-Ray Crystallography
Membrane Proteins and Transport; Intracellular Signals; Cytokines and Receptors
Enzyme Structure and Mechanisms; Cellular Regulation; Phosphorylation and Dephosphorylation
Plant Biochemistry and Molecular Biology
Protein Structure and Function; Proteases, Protein Turnover, and Post-translational Processing
Gene Expression, Transcription, and Translation

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^a, ^b, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5×7 -in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column width, $3\frac{1}{2}$ in.) and submitted no larger than $8\frac{1}{2} \times 11$ in. Lettering on drawings should be of professional quality or generated by high-resolution computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, high-quality computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Cover photographs. Suggestions for cover photographs are welcome. Submit them as slides with $8\frac{1}{2} \times 11$ -in. color or black-

and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of the most recent edition of *Chemical Abstracts Service Source Index*. Please note the following examples.

1. Terry, M. J., Wahleithner, J. A., and Lagarias, J. C. (1993) *Arch. Biochem. Biophys.* **306**, 1–15.
2. Bolander, F. F. (1989) *Molecular Endocrinology*, Academic Press, San Diego.
3. Compton, T. (1990) in *PCR Protocols: A Guide to Methods and Applications* (Innis, M. A., Gelfand, D. H., Sninsky, J. J., and White, T. J., Eds.), pp. 39–45, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Manuscripts may be submitted to **Archives of BIOCHEMISTRY AND BIOPHYSICS** on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in these Instructions to Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).

ANALYTICAL BIOCHEMISTRY

Methods in the Biological Sciences

Editor-in-Chief

William B. Jakoby

National Institutes of Health, Bethesda, Maryland

Editorial Office: 525 B Street, Suite 1900, San Diego, CA 92101-4495

Analytical Biochemistry emphasizes methods and methodology in the biological and biochemical sciences and all related fields. The journal publishes the results of original research as well as reviews of methods.

Publishing Methods in:

- Analytical techniques
- Membranes and membrane proteins
- Molecular genetics: cloning, sequencing, and mutagenesis
- Novel methods of protein purification
- Immunological techniques of applicability in biochemistry
- Immunoassays that introduce a unique approach
- Cell biology, general cell and organ culture
- Pharmacological and toxicological research techniques

Analytical Biochemistry includes two additional major sections:

- Reviews –publishing review articles that cover subject matter
- Notes and Tips—a new section featuring methods that can be summarized in a shorter format allowing more rapid publication, including helpful "kitchen tricks"

Volumes 216–223 (1994), 16 issues (including annual subject index)

ISSN 0003-2697

Drug Delivery

The Journal of Delivery and Targeting of Therapeutic Agents

Editor

Alfred Stracher

State University of New York
Health Science Center
at Brooklyn, New York

Drug Delivery focuses on drug delivery technology at the theoretical as well as practical level. The ability to selectively deliver therapeutic agents to specific cells within the body has been one of the most coveted goals in experimental and clinical therapeutics. This journal provides a single literature source for both the academic and industrial communities in this advancing area of study.

Drug Delivery includes basic research, development, and application principles on the molecular, cellular, and higher levels of target sites, as well as physical, chemical and immunokinetic modes of delivery.

Volume 1 (1993/1994), 4 issues

ISSN 1058-241X
